

Project Proposal Presentation Guidelines

Assalamualaikum everyone,

During our next lab class, we will have a session on Raspberry Pi Image Processing. After that, both groups are required to present their project proposals to me through a formal presentation. In this presentation, you must cover the following topics:

1. Project Title
2. Short Introduction about your project [1 slide]
3. Motivation [1 slide]
4. Hardware Components (with costs) [1 slide]
5. Simplified Diagram/Flowchart/Pictorial Representation of your project [1-2 slides]
6. Features of Your Project [4-8 slides]

Each team will have 15 minutes to present their project proposal. During the presentation, participation from all team members is mandatory. If any team member does not present without a valid and strong reason, they will not receive any marks allocated for the project proposal presentation.

Wishing you all the best!

Thank you.
